

Absorbent Pads

Manufactured in USA from recycled fibres
Double the absorbency of most other pads

- Due to the extra thickness of Eversoak Absorbent Pads, independent tests have shown them to have double the fluid absorption capacity of competitors' general purpose pads.
- Made with 80% recycled cellulose fibres to create superior absorbency and a more cost effective alternative than oil based polypropylene sorbent pads.
- Class A fire retardant (lab tested per ASTM E84).
- Absorbs oil, water, grease, transmission fluid, coolants, and many other fluids.

Model	Pad Size	Absorption Capacity	Qty per Carton
FXPAD	380 x 480 mm	1.5 Litres of oil	50
